

designed and created for your needs

Designed to provide an exceptional level of performance for every work on site ensuring the right balance between power and ease of use

protection security control

X-GUARD

Construction sites

Secure entry points, store equipment safely, monitor remote corners.

Industrial areas

Keep track of assets and protect sensitive infrastructure.

Public events & concerts

Temporary crowd control and safety monitoring—silent, clean, and compact.

Logistics hubs & warehouses

Monitor vehicle movements, loading zones, and storage areas 24/7.

Remote/off-grid areas

Bring reliable surveillance to places with no fixed power or data lines.

Emergency and disaster relief

Quick to deploy in natural disasters or crisis zones for temporary monitoring.

Parking lots & service areas

Deter vandalism and theft where no permanent infrastructure is present.

Military, border or infrastructure surveillance

Mobile solution for sensitive, high-risk zones.

friendly future

TRIME[®]
SECURITY TOWER

X-GUARD

protection
security
control

ZERO
emissions

ZERO
noise

POWERED
from mains
or generator

key Features

Manual vertical telescopic mast (max height: 4,2 m)

External power sources required

Galvanized skid with forklift pocket

Electric box 50x50x30 cm

4 adjustable stabilizers for maximum stability

Manual mast winch and handle inside the structure

Lockable cabinet for electronic components

Compact footprint – optimized for transport and storage

33 unit per truck, very compact

Forklift pockets and lifting eyes for easy handling

Ready-to-use design – no setup tools required

Mast head customizable based on customer request (max 40 kg)

Technical data	
Mast	
Lifting Method	Manual
Max Mast Height (m)	4,2
Rotation	no
Safety brake	Mechanical
Power Options	
input power from mains or generator	
Dimensions	
Transport dimensions (mm) LxWxH	1046x793x2075
Dimensions in operation (mm) LxWxH	1823x1593x4200
Weight (kg)	180 kg

Dimensions	Internal – space available for user to fit electrical components inside the tower
Length (mm)	500
Width (mm)	500
Height (mm)	300

easy handling & transportability

appearance

User
Benefits

One-person setup:
no need for specialized personnel

Completely self-contained:
no external structures or power needed

Silent and zero-emission when powered by
mains or from internal add on battery pack

Vandalism and theft-resistant:
reinforced and lockable design

Quick transport and deployment:
ideal for temporary or emergency use

Weatherproof and durable:
hot-dip galvanized frame resists corrosion

Custom branding available:
adapt the look to your company

Safe for public areas:
compact, clean and professional appearance
Ideal for construction, events, logistics hubs,
emergency zones

Can be equipped with Wi-Fi,
environmental sensors, or LED lighting

Stable performance in all terrains:
adjustable feet and strong base

can be customized with:

- LED lights, environmental sensors
- Surveillance systems (CCTV - PTZ - IP)
- Wireless connections (Wi-Fi, LTE, 5G)

FAQ

Frequently Asked Questions

Do I need a technician to set it up?

No. The X-GUARD is designed for easy, manual setup by just one person. No tools or technical skills required.

Can I use it where there is no mains ?

Yes. It runs either on External power sources, making it perfect for remote or off-grid locations.

Is it difficult to transport?

Not at all. It's equipped with forklift pockets and lifting eyes, and 33 units fit on a standard truck.

Can it resist vandalism or theft?

Yes. The entire system is housed in a reinforced, fully lockable steel box, designed to prevent tampering and unauthorized access.

What can I install on the mast?

Any standard CCTV cameras, floodlight, or sensors. The top is compatible with most commercial surveillance and lighting systems.

Does it make noise during operation?

No. When powered from mains, it runs silently with zero emissions—perfect for residential or urban zones.

Can I customize the appearance?

Yes. We offer custom branding and colour options for your company or event.

What happens if it rains or snows?

No problem. The tower is weatherproof, built with hot-dip galvanized skid to resist in any environment.
